

CTPAT Business Partner Security Assessments

Members must ensure their business partners demonstrate that they are meeting CTPAT security criteria via written/electronic confirmation (e.g., contractual obligations; via a letter from a senior business partner officer attesting to compliance; a written statement from the business partner demonstrating their compliance with CTPAT security criteria or an equivalent WCO accredited security program administered by a foreign customs authority; or, by providing a completed security questionnaire.

Star USA helps businesses assess their supply chain security and satisfy CTPAT membership requirements by utilizing our proprietary online security assessment software and grading platform, Secure Global Trade (SGT).

Using this custom tooling, Star USA

- ✓ Sends online risk assessment questionnaires to the appropriate partners
- ✓ Analyzes and provides comprehensive risk-based scoring
- ✓ Performs additional analysis of the business partner's country
- ✓ Develops Corrective Actions based on assessment responses
- ✓ Provides the results to you for use in your annual company risk assessment

The following documents and information are examples of

- ✓ The risk report generated from the business partner's responses
- ✓ A country report evaluating the risk of the partner's home country
- √ A copy of the partner's completed risk assessment

CTPAT Security Assessment Results & Corrective Action Plan

Prepared for Example Contact

Example Company

Risk Score | 78%

Risk

The Risk Score indicates the probability that a hazard will result in an adverse consequence when dealing with this business partner. The higher the risk percentage, the more likely an event is to occur. Assessing the risk of business partners and their country helps to determine the proper mitigation strategy and priorities. Risk ratings and scaling can show where additional resources are required.

Vetting third-party relationships is a critical first step to mitigating risk to your organization, but it's only a first step. The business must work together with various stakeholders to increase value within the supply chain. Companies that succeed can both protect their brands and drive business growth. Example Company's risk score of 78% indicates moderate risk. You should use standard caution when doing business with example company.

Example risk factors include:

- ✓ Years in business
- ✓ Mutual Recognition Programs
- ✓ Volumes
- ✓ Direct Imports, Exports

- ✓ Geography
- ✓ Specific Commodities
- ✓ Modes of transport
- ✓ Other services provided

Readiness Score |85%

Readiness

The Readiness Score indicates the ability of this partner to withstand risks and threats to their organization and your supply chain. The higher the readiness percentage, the more likely the partner is to resist or eliminate the risk before it impacts your supply chain. Assessing the readiness of your business partners helps you to proactively address shortcomings in your supply chain.

Providing training and support to your supply chain to increase readiness is critical for the holistic risk mitigation approach. Risk Champions within the organization should work together to foster increased awareness and readiness from all supply chain partners. **Example Company's readiness score of 85% indicates an acceptable level of readiness.**

Example Readiness factors include:

- ✓ Work Instructions
- ✓ Access Controls
- ✓ Physical Structure
- ✓ Direct Imports, Exports

- ✓ Supply Chain Security Policy
- ✓ Visitor Policy
- ✓ Modes of transport
- ✓ Other services provided

Areas of Concern

The following is a list of sections and specific areas of concern because of the answers provided in the security assessment. Each one of the below concerns should be discussed with the business partner and the suggested corrective actions should be implemented. To aid in the implementation of corrective actions, the business partner should use the "Corrective Action Checklist" provided in the following pages. Use this checklist as a guide when beginning to address non-conformance issues and corrective actions. This will help the business document and provide reporting on the recommended corrective actions.

Business Partners

Area of Concern #1

Example Company indicated it does not have documentation for business partners indicating if they are CTPAT certified and if they are eligible.

Corrective Action #1

For those business partners eligible for CTPAT certification (carriers, ports, terminals, brokers, consolidators, etc.) the importer must have documentation (e.g., CTPAT certificate, SVI number, etc.) indicating whether these business partners are or are not CTPAT certified. Example Company must begin to track this information via a documented process and procedure.

Area of Concern #2

Example Company indicated it does not inform business partners of security processes and procedures that are consistent with the CTPAT security criteria to enhance the integrity of the shipment at point of origin.

Corrective Action #2

Importers must inform business partners of security processes and procedures that are consistent with the CTPAT security criteria to enhance the integrity of the shipment at point of origin. Example Company must define, document and provide relevant security information to their business partners.

Container Security

Area of Concern #3

Example Company indicated all loaded trailers bound for the U.S. are not affixed with a high security seal that meets or exceeds the current PAS ISO 17712:2013 security standard.

Corrective Action #3

All trailers bound for the U.S. Must be affixed with a high security seal that meets or exceeds the current PAS ISO 17712 2013 security standards. Example Company must develop a documented process for the storage, distribution and usage of high-security seals.

Assessing Country Risk in Global Trade

Japan

Risk Rating - Extremely Low

Proceed with **standard caution** when conducting business with Japan.

Score	Risk Area
В	Security
Α	Political Stability
В	Government Effectiveness
A	Regulatory Risk
В	Macroeconomic Risk
A	Foreign Trade
A	Financial
В	Tax Policy
В	Labor Market
Α	Infrastructure

Background

Japan attacked US forces in 1941 - triggering America's entry into World War II - and soon occupied much of East and Southeast Asia. After its defeat in World War II, Japan recovered to become an economic power and an ally of the US.

Following three decades of unprecedented growth, Japan's economy experienced a major slowdown starting in the 1990s, but the country remains an economic power. In March 2011, Japan's strongest-ever earthquake, and an accompanying tsunami, hobbled the country's economy and its energy infrastructure, and tested its ability to deal with humanitarian disasters.

Prime Minister Shinzo ABE was reelected to office in December 2012, and has since embarked on ambitious economic and security reforms to improve Japan's economy and bolster the country's international standing.

Aum Shinrikyo (terrorist group) aims to attract new members seeking religious guidance and exhibiting a willingness to financially support the organization; historically, leaders sought to overthrow the Japanese Government and to spark a nuclear war between Japan and the US to create a global Armageddon, 'cleansing' the world so its members could achieve salvation

Economy

Japan enjoyed an uptick in growth since 2013, supported by Prime Minister Shinzo ABE's "Three Arrows" economic r evitalization agenda - dubbed "Abenomics" - of monetary easing, "flexible" fiscal policy, and structural reform. Led by the Bank of Japan's aggressive monetary easing, Japan is making modest progress in ending deflation, but demographic decline – a low birthrate and an aging, shrinking population – poses a major long-term challenge for the economy.

In August 2015, Japan successfully restarted one nuclear reactor at the Sendai Nuclear Power Plant in Kagoshima prefecture, and several other reactors around the country have since resumed operations; however, opposition from local governments has delayed several more restarts that remain pending. Reforms of the electricity and gas sectors, including full liberalization of Japan's energy market in April 2016 and gas market in April 2017, constitute an important part of Prime Minister Abe's economic program.
