CTPAT Services

Certification Support

We offer a simple way to become CTPAT Certified for all eligible businesses by providing a variety of products and services designed to help you obtain and maintain your Certification. From initial consultation through final acceptance, we maintain your yearly compliance obligations and ensure successful Re-Validations.

5-Step Risk Assessment

This is the fulcrum of your CTPAT membership and the most comprehensive way to demonstrate compliance with CTPAT requirements. The 5 Step Risk Assessment is a mandatory element, from mapping the cargo flow to documenting your assessment process.

Annual Security Profile (ASP) Monitoring

ASP upkeep is one of the critical elements in CTPAT membership. The portal is CBP's window into your activities and processes. By working with you to maintain an active presence in the CTPAT Portal, the SGT team helps ensure you consistently maximize the benefits of your CTPAT program.

Documented Procedures

The CTPAT Compliance Manual is a comprehensive, step-by-step guide using specific procedure models to design and implement a security policy that addresses the unique framework of your business. This manual guides you toward implementing a company-wide CTPAT program that will meet all necessary CTPAT requirements.

Online Risk Assessments

Our risk assessment tools are a game changer and provide you the peace-of-mind and analysis you need for making supply chain decisions. Detailed reporting, insights and corrective actions are just part of our robust assessment process. Validation of security practices and understanding supply chain risk has never been easier.

Post Incident Analysis

We assist in investigating misconduct – i.e. theft, fraud, loss, and smuggling – to determine the true nature and scope of the problem, should one be present. We tie all the various facts and documents together, coordinate with your Loss Prevention teams, and help you understand the impact on your business.
